

AIL 155 00052

**DATE: 3-12-21**

**INVESTIGATOR: Rachel Neisius**

**WEATHER: Cloudy, 50°F, E Wind, 10-15 MPH**

**STOP 1 – HIGHWAY 66 WEST of ASHLAND GUN CLUB**

1149 Hours

Open water, fairly clear water, can see the bottom. Water was flowing slowly. No odor noted.

**STOP 2 – North of the Intersection of COUNTY ROADS 6 & F**

1155 Hours

Looking west at creek and culvert, the creek was open water, and did not appear to be flowing. Water looked murky yellow/brown. No odor.

On the east side of culvert – south side of creek, looking north towards culvert, the creek was open, but did not have much water. Mostly puddles. No odor.

**STOP 3 – Road 7/Highway 66**

1206 Hours

On west side of culvert looking east. No apparent flooding, tractor with engine and hose were present. Not actively pumping. Water did not appear to be flowing, and was low. Water was turbid and brown. No odor.

On the east side of the road, there was ponding of water, which was turbid, and did not appear to be flowing. Had green duckweed growth on the surface of the water.

**STOP 4 – County Road 8, North of Road H**

1216 Hours

Looking west at the creek from Road 8, the creek was very low, with now flowing water. Signs of erosion behind the culvert. No noticeable odor.

Looking east at the creek on the east side of Road 8, the water was low, with no flow. Water was a murky brown color.

**STOP 5 – UN-L Eastern Extension – North of County Roads 9 & J**

1446 Hours

Looking at the creek on the west side of Road 9 at the culvert, I saw no noticeable flow. The creek was low, and had some sparse duckweed gathering near the culvert. I saw a dead frog in the water. No active pumping. I noticed a faint sweet smelling odor.

The creek on the east side of Road 9 was low, mostly muddy with some standing water. The creek was a murky brownish color.

**Notes:** No photographs were taken on this trip.
