Greg Lang, NDEE, emailed me on December 5, 2019 requesting that I contact Pat Trede. Mr. Trede contacted the department regarding concerns he had with the piles of wet cake at AltEn as well as odors.

I telephoned Mr. Trede a little after 1:00 p.m. to discuss his concerns. I explained to him that the department does not regulate odors. I briefly discussed the most recent NOV sent to the facility regarding the management of their wet cake and said that the facility disagreed with the department's position and we were drafting a response letter to them. I encouraged Mr. Trede to review the files available on the department's public website and provided my contact information to him in case he needed help accessing the files. I also encouraged him to contact me should he have any further questions and/or concerns. He was appreciative that the department was trying to take action to resolve the matter.
