RE: Anaerobic Digester Floors, Solid Waste Management System

STATE CONSTRUCTION PERMIT NO. 05-0158

Dear Mr. Tracy:

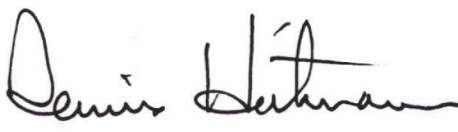

Pursuant to Neb. Rev. Stat. Sec. 81-1506 (2) (Reissue 1994), documents describing this project have been approved and stamped accordingly. One set of documents is being retained for this Department's records, and the rest are being returned to the **submitting engineer** for distribution, including a construction certification card to be returned to this Department.

This construction permit is for the floor slabs of two 4,000,000 gallon anaerobic digester tanks only. No other construction work is included in this permit.

Compliance with minimum sanitary engineering design criteria was the only consideration in the review of this project, as only sanitary related documents were reviewed, unless specifically noted in review comments. **This construction permit does not supersede any required local review or permit**, nor release the owner from the responsibility of providing an operable facility. If significant changes are needed during construction, change orders must be submitted to this Department, and as-built plans may be required. Please refer to our construction permit number.

Pursuant to Delegation Memorandum dated January 12, 1999, and signed by the Director, the undersigned hereby executes this document on his behalf. **If you have questions, please contact Charles Duerschner, P.E., Supervisor, Technical Assistance Unit, at (402) 471-4206.**

Sincerely,

for Patrick W. Rice
Assistant Director
