Mr. Pat Tracy
Nebraska BioClean
4780 S. 131st Street
Omaha NE 68137

RE: Digester Tanks, Inlet Tank, & Outlet Tank, Solid Waste Management System
Nebraska BioClean Ethanol Plant, Mead, Saunders Co.

STATE CONSTRUCTION PERMIT NO. 05-0158-02

Dear Mr. Tracy:

Pursuant to Neb. Rev. Stat. Sec. 81-1506 (2) (Reissue 1994), documents describing this project have been approved and stamped accordingly. One set of documents is being retained for this Department's records, and the rest are being returned to the **submitting engineer** for distribution, including a construction certification card to be returned to this Department.

This construction permit is for one 500,000 gallon inlet tank structure, one 500,000 gallon outlet tank structure, and two 4,000,000 gallon digester tank structures for the digester system only. No other construction work is included in this permit.

Compliance with minimum sanitary engineering design criteria was the only consideration in the review of this project, as only sanitary related documents were reviewed, unless specifically noted in review comments. **This construction permit does not supersede any required local review or permit**, nor release the owner from the responsibility of providing an operable facility. If significant changes are needed during construction, change orders must be submitted to this Department, and as-built plans may be required. Please refer to our construction permit number.

The undersigned issues this document on behalf of the Director in accordance with Title 123 – Rules and Regulations for Design, Operation and Maintenance of Wastewater Treatment Works.

If you have questions, please contact Charles Duerschner, P.E., Supervisor, Technical Assistance Unit, at (402) 471-4206.

Sincerely,

Patrick W. Rice
Assistant Director
