MEMORANDUM

To: File

From: Jason Windhorst

Date: 1/31/2019

RE: AltEn, LLC

NDEQID: 84069

Program ID: NE0137634, NER910444

On January 25, 2019 another drive by observation inspection was conducted while in route from another facility and a very strong odor was observed (Sour dairy and pesticide odor). On January 31, 2019 a perimeter inspection was conducted on the trip back from another inspection to assess any changes in odor or activity. The odor was much less potent on the 31st, but activities at the northwest corner of the facility warranted a second pass by to assess what was taking place. There was a front end loader loading side-dump semi-trailers with distillers grains and was not being well managed in regards to housekeeping. The loader was spilling the material on the wheels and sides of the trailers, which was then tracked out onto county road 10. The material tracked out was visible on the pavement for approximately 1.0-1.5 miles north of the facility.
