

## **MEMORANDUM**

---

**DATE:** January 10, 2019  
**TO:** AltEn LLC – file      **FACILITY ID:** 84069  
**THRU:** Brad Pracheil *BP*  
**FROM:** Rachel Neisius  
**RE:** Site visit

On January 09, 2019, I, Rachel Neisius conducted an odor investigation in the Mead area at 3:15 pm. Investigation was conducted in response to myself smelling foul odors throughout the Village of Mead, first noticed at the Mead Elementary School on the same day. It was 32 °F with winds out of the NW at approximately 2-5 mph.

**Observations:**

- 1) I could smell a strong odor similar to that of a landfill, at the Mead Elementary school on the Northwest side of town.
- 2) The odor remained consistent as I drove across town and south on Road 10, towards the AltEn LLC facility.
- 3) I drove to County Road K, directly north of the facility. The odor was still very strong along this road from where I turned off of Road 10, to the end of the mile road, where I turned around.
- 4) I then drove to County Road J, to the south of the facility. The odor was still very strong, all the way until I turned around at the end of the mile.
- 5) After leaving this area, I drove back to the Village of Mead, and continued north on Road 10 for one mile until I reached County Road N, where I turned west and drove to highway 77. I could no longer smell the odor during the mile I drove of County Road N.
- 6) I left the site at about 3:45 pm.
