MEMORANDUM

DATE: February 4, 2021
TO: AltEn LLC – file **FACILITY ID:** 84069
THRU: Brad Pracheil *BP*
FROM: Rachel Neisius
RE: Site visit

February 4, 2021, I, Rachel Neisius conducted air quality monitoring in the Mead area at 2:00 pm. Investigation was conducted in response to continuing concerns from area residents smelling foul odors and improper use of wet cake. It was 23 °F, sunny, with winds out of the NW at approximately 15-20mph.

Observations:

- 1) I drove Road 10 past the facility multiple times, and saw multiple semis with hopper style trailers sitting at the facility, and one semi with a full, tarp covered side dump trailer moving on the facility, and a liquid tanker truck pull on to the property as I drove past.
- 2) I saw a green tinge was still on both the east and west ends of the northern large Quonset building since the last time I was at the facility on 2/2/21.
- 3) I stopped and viewed the facility from county road K, so I could see the entrance of the facility. I saw no semis leave the facility during the time I was there. I saw a grain truck and a tanker truck waiting to go over the scale in to the property.
- 4) On my last drive past the facility, I saw a different grain truck pull on to the property.
- 5) I saw no activity near the wet cake pile while I was monitoring.
- 6) I saw a green metal shipping container and two small augers by the wet cake pile. The augers seem to be in the same place as the prior visit on 2/2/21. The green metal container appears to be the same container I saw on 2/2/21, but is a different container than the blue one(s) noted in previous memos.
- 7) I left the site at about 2:20 pm.
