

## **MEMORANDUM**

---

**DATE:** February 9, 2021  
**TO:** AltEn LLC – file      **FACILITY ID:** 84069  
**THRU:** Brad Pracheil  
**FROM:** Rachel Neisius  
**RE:** Site visit

February 9, 2021, I, Rachel Neisius conducted air quality monitoring in the Mead area at 3:00 pm. Investigation was conducted in response to continuing concerns from area residents smelling foul odors and improper use of wet cake. It was 5 °F, mostly sunny, with winds out of the W at approximately 0-5 mph.

### Observations:

- 1) I drove Road 10 past the facility multiple times, and saw multiple semis with hopper style trailers sitting at the facility, but no semis moving on site.
- 2) I saw a green tinge was still on both the east and west ends of the northern large Quonset building since the last time I was at the facility on 2/4/21.
- 3) I stopped and viewed the facility from county road K, so I could see the entrance of the facility. I saw no semis leave the facility during the time I was there.
- 4) I saw no activity near the wet cake pile while I was monitoring, and there appeared to be no significant change to the pile since my last visit.
- 5) I smelled no odors.
- 6) I saw a green metal shipping container and two small augers by the wet cake pile. They appear to be the same as last time, and in the same spots as before.
- 7) I left the site at about 2:20 pm.
