

AltEn, LLC, Multi Media Site Report
NDEE ID: 84069 (Air) (IWM) (Wastewater)
Program IDs: NE0137634, NER910444

To: File
From: Jason Holsten
Date of Visit: 1/22/2021, 0955 - 1015

- ☐ Wastewater pivot irrigation system in use on the north side of the property/land application equipment (pumps, hose, etc.) on site. The system was not observed to be in use.
- ☐ Wastewater land application equipment (pumps, hose, etc.) running from facility to be land applied (check for hose in ditch West of the facility). No equipment was observed.
- ☐ Excessive track out at site entrance(s). No track out was observed.
- ☐ Loaded trucks leaving site. No trucks observed leaving the site.
- ☐ Loaders/evidence of loading at distillers' grain stockpiles. No loading of DG observed.
- ☒ Odors – Slight odors detected west of the facility along County Rd 10.
- ☐ Estimation of amount of wetcake/distillers grain on site: Not determined. Amount observed appear to be similar to observations I made on 9/11/20. It appeared that the facility may be stockpiling distillers grain in a location located north of the office building. I did not enter the property to confirm.
- ☐ Location of stockpiles of wetcake/distillers grains: Northwest and northeast corners of the property.
- ☐ Is the Bio-Char unit running? No, it did not appear that the unit was running.
- ☐ Is there opacity coming from the Bio-Char unit (heavy smoke that lingers, Steam will dissipate). N/A

Other: weather conditions were overcast, 22°F and northeast wind at 6 mph.
