

CALENDAR FOR EXISTING SOURCES

Compliance Dates:	No Later Than:	Comment
Management practices for metallic scrap in §63.10885(a) and binder formulations in §63.10886	January 2, 2009	Applies to all area source foundries.
Management practices for mercury switch removal in §63.10885(b)	January 4, 2010	Applies to all area source foundries.
Emission standards and management practices in §63.10895	January 2, 2011	Applies only to large foundries. Must comply no later than 2 years after submission of initial notification of size classification.

Notifications:	Due No Later Than:	Comment
Initial notification of applicability per §63.9(b)(2)	May 1, 2008	Due no later than 120 days after effective date (January 2, 2008).
Initial notification of size classification based on 2008 metal melt production	January 2, 2009	
Notification of compliance status per §63.9(h) for management practices for metallic scrap and binder formulations	February 1, 2009	Applies to all foundries. Due no later than 30 days after compliance date (January 2, 2009).
Notification of compliance status per §63.9(h) for management practices for mercury switch removal	February 3, 2010	Applies to all foundries. Due no later than 30 days after compliance date (January 4, 2010).
Notification of intent to use previous test data instead of conducting new performance test	March 3, 2011	Applies only to large foundries subject to emission standards. Due no later than 60 days after compliance date (January 2, 2011).
Notification of opacity test	June 1, 2011	Due no later than 30 days before test
Notification of PM/metal HAP performance test	May 1, 2011	Due no later than 60 days before test.
Conduct performance test	July 1, 2011	Performance test must be conducted no later than 180 days after compliance date (January 2, 2011).
Notification of compliance status per §63.9(h) for emission limits, capture and collection system, O&M plan, bag leak detection system monitoring plan (if applicable)	July 31, 2011 or August 30, 2011	Applies only to large foundries. Due no later than 30 days after initial tests (July 1, 2011) if only an opacity test is conducted and no new PM or metal HAP test is conducted or no later than 60 days after initial test (July 1, 2011) if a new PM or metal HAP test is conducted.
