# 2A – NPDES Permit Application to Discharge Wastewater NEW and EXISTING PUBLICLY OWNED TREATMENT WORKS

- a. All new and existing publicly owned treatment works (POTWs) discharging or proposing to discharge pollutants from a point source into any waters of the state are required to apply for and have a permit to discharge as required by 40 CFR 122.21 (a).
- b. All permittees with a currently effective permit shall submit a new application 180 days before the expiration date of the existing permit.
- c. Facilities proposing a new discharge must submit an application 180 days prior to the date proposed for commencing operation.
- d. In the case of a facility that has yet to commence discharge, provide all information available at the time the application is completed.
- e. If you do not have enough space on the form to answer a question, you may continue on additional sheets, as necessary, using a format consistent with this form.

### 2.8 Effluent Testing Data/Pollutant Scan

- a. Effluent testing/pollutant scan Tables A through E are attachments to Form 2A. Instructions for completing the tables are table-specific, as are the criteria for determining which tables are required. Read Attachment C: "General Instructions for Reporting, Sampling, and Analysis" before completing the applicable Tables. Additional guidance is located at <a href="http://dee.ne.gov">http://dee.ne.gov</a>
- b. For POTWs applying prior to commencement of discharge, data shall be submitted no later than 24 months after the commencement of the discharge.
- c. Provide data from a minimum of three samples taken within 4.5 years prior to the date of the permit application. Samples must be seasonally representative. Existing data may be used, if available, in lieu of sampling done solely for the purpose of this application. If the applicant samples for a specific pollutant on a monthly, or more frequent basis, it is only necessary, for such pollutant, to summarize all data collected within one year of the application.

All applicants must sample and analyze for the pollutants listed in Table A. Complete **Table A** and attach the results the application.

Completed and Attached

If the POTW has a design flow greater or equal to 0.1 mgd, and uses chlorine for disinfection, uses chlorine elsewhere in the treatment process, or otherwise has potential to discharge chlorine in its effluent, complete **Table B** and attach results to the application.

Completed and Attached

Not Applicable

If the POTW has a design flow greater or equal to 0.1 mgd, and does **NOT** use chlorine for disinfection, use chlorine elsewhere in the treatment process, or otherwise has potential to discharge chlorine in its effluent, complete **Table B**, **omitting chlorine**, and attach results to the application.

Completed and Attached

Not Applicabl

If the POTW has a design flow greater than or equal to 1 mgd, **OR** is required by the Department to sample additional parameters (such as WET testing), complete **Tables C**, **D**, **and E** as applicable and attach results to the application.

Table CCompleted and AttachedNot ApplicableTable DCompleted and AttachedNot ApplicableTable ECompleted and AttachedNot Applicable

If the POTW conducted WET tests during the 4.5 years prior to the date of the application on any of the facility's discharges or on any receiving water near the discharge point, indicate below the number of acute and chronic WET tests conducted by outfall number or of the receiving water.

|                    | Outfall # | Outfall # | Outfall # |
|--------------------|-----------|-----------|-----------|
| Number of tests of |           |           |           |
| discharge water    |           |           |           |
| Number of tests of |           |           |           |
| receiving water    |           |           |           |

If the POTW conducted either a minimum of four quarterly WET tests for one year preceding this permit application or at least four annual WET test in the past 4.5 years, and have previously submitted the results to the Department, provide the information below. Include if the tests resulted in toxicity and the cause(s) of the toxicity.

| Date(s) Submitted | Summary of Results |
|-------------------|--------------------|
|                   |                    |
|                   |                    |

If any WET tests resulted in toxicity, provide details of any toxicity reduction evaluations conducted.

Not Applicable

If the POTW has **NOT** previously submitted WET testing information to the Department, complete **Table E** for all applicable outfalls and attach the results to the application.

Completed and Attached

Not Applicable

# SECTION 3: Additional Information for Applicants with a Design Flow Equal to or Greater than 0.1 mgd

40 CFR 122.21(j)(1) and (2)

If the treatment works design flow is less than 0.1 mgd, skip to section 4.

Section 3 applies, complete below

Section 3 does not apply, skip to section 4

### 3.2 Topographic Map and Process Flow Diagram

Attach a topographic map to this application (or other map if topographic map is unavailable) extending at least one mile beyond property boundaries of the treatment plant, including all unit processes. See 40 CFR 122.21(j)(2)(ii) for complete requirements.

Completed and Attached

Attach a process flow diagram or schematic to this application showing the processes of the treatment plant **with a narrative description**. See 40 CFR 122.21(j)(2)(iii) for complete requirements.

Completed and Attached

## 3.3 Scheduled Improvements and Schedules of Implementation

a. If improvements are scheduled, complete the information below.

Briefly list and describe the scheduled improvements.

1.

2.

3.

| Scheduled or Actual Date of Completion for Improvements |             |              |                  |                 |                   |  |
|---|-------------|--------------|------------------|-----------------|-------------------|--|
| Scheduled   | Affected    | Begin        | End Construction | Begin Discharge | Attainment of     |  |

| 1.  |             |              |                  |                 |                   |  |
| 2.  |             |              |                  |                 |                   |  |
| 3.  |             |              |                  |                 |                   |  |

Describe appropriate permits and clearances concerning other federal/state requirements.

# **SECTION 4: Industrial Discharges and Hazardous Wastes**

40 CFR 122.21(j)(6) and (7)

If the treatment works does **NOT** receive discharges from significant industrial users (SIUs) or non-significant categorical users (NSCIUs), **AND** does **NOT** receive hazardous wastes from Resource Conservation and Recovery (RCRA) sites, Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) sites, or wastewaters that originate from another type of cleanup or remedial activities, skip to **section 5**.

Section 4 applies, complete below

Section 4 does not apply, skip to section 5

## 4.1 Industrial Discharges

- a. SIUs are users that discharge:
  - an average of 25,000 gpd or more of process wastewater to the POTW (with certain exclusions),
  - or contributes a process wastestream which makes up 5 percent or more of the average dry weather hydraulic or organic capacity of the POTW.
  - or are subject to Categorical Pretreatment Standards (e.g. metal finishing).
  - Include users that truck or haul waste.

| molado dooro triat traok or riadi wast | molado dooro triat traok or ridar wasto. |  |  |  |  |
|--|--|--|--|--|--|
| Number of SIUs                         | Number of NSCIUs                         |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

If the POTW has a Memorandum of Agreement with the Department AND provides all the information included in Table F in an annual report submitted within 1 year of the application, provide the submittal date of the report and skip to section 4.2.

Annual Report Submittal Date

Not applicable

If the POTW has not submitted the information in Table F within 1 year of the application, complete **Table F** for all SIUs and attach to the application.

Completed and Attached

### 4.2 Hazardous Waste Generators

- a. Hazardous waste generators and sites include:
  - Regulated RCRA hazardous wastes pursuant to 40 CFR 261,
  - Remedial activities including those undertaken pursuant to CERCLA and Sections 3004(7) or 3008(h) of RCRA,
  - Include users that truck or haul waste.

If the POTW receives or has been notified it will receive any hazardous wastes, complete **Table G** and attach to the application. If the POTW receives (or is expected to receive) less than 15 kilograms/month of non-acute hazardous wastes as specified in 40 CFR 261.30 (d) and 261.33(e), **skip to section 5**.

Completed and Attached

Not Applicable, skip to section 5

## SECTION 5: Checklist and Certification Statement

40 CFR 122.22(a) and (d)

#### 5.1 Checklist

- a. In Column 1 below, mark the sections of Form 2A that you have completed and are submitting.
- For each section, specify in Column 2 any attachments you are including.
- c. Bolded items are required by all applicants.

# Attachment C: General Instructions for Reporting Sampling and Analysis

**Important note:** Read these instructions before completing Tables A through E and Section 2 of Form 2A.

### **General Items**

Complete the applicable tables for each outfall at your facility. Be sure to note the facility ID Number, NPDES permit number, facility name, and applicable outfall number at the top of each page of the tables and any associated attachments.

You may report some or all of the required data by attaching separate sheets of paper instead of completing Tables A through E for each of your outfalls, so long as the sheets contain all of the required information and are similar in format to Tables A through E. For example, you may be able to print a report in a compatible format from the data system used in your analysis of metals completed under Table C.

**Note for new dischargers.** Provide all information available to you at the time you complete Form 2A. If you do not have information to respond to an item because your facility has yet to discharge, write or type "data are not available" next to the item on the form. Note that you are required to submit *actual* data no later than 24 months after your facility commences discharge.

### **Reporting of Effluent Data**

Provide data for each outfall through which effluent is discharged. When an applicant has two or more outfalls with substantially identical effluents, the Department may allow the applicant to test only one outfall and report that quantitative data as applying to the substantially identical outfall. If the permitting authority grants your request, attach a separate sheet to the application form identifying the outfall tested and describing why the other outfall(s) are substantially identical.

At a minimum, effluent testing data must be based on at least three samples taken within 4.5 years prior to the date of the permit application. Samples must be representative of the seasonal variation in the discharge from each outfall. Existing data may be used, if available, in lieu of sampling done solely for the purpose of this application.

All existing data for pollutants specified in Tables A through D that is collected within 4.5 years of the application must be included in the pollutant data summary that you submit. If, however, you sampled for a specific pollutant on a monthly or more frequent basis, it is only necessary, for such pollutant, to summarize all data collected within 1 year of the application.

Clearly specify the units of measure on Tables A through E for each parameter/pollutant analyzed. Values should be reported as concentration or mass, except for flow, temperature, pH, and fecal coliform organisms, unless otherwise requested or required by the Department. Flow, temperature, pH, and fecal coliform organisms must be reported as mgd, degrees Fahrenheit (°F), standard units, and most probable number per 100 milliliters (MPN/100 mL), respectively. Use the following abbreviations in the columns requiring "units" in Tables A through D.

| Concentration               | Mass                      |
|-----------------------------|---------------------------|
| ppm = parts per million     | lbs = pounds              |
| mg/L = milligrams per liter | ton = tons (English tons) |
| ppb = parts per billion     | mg = milligrams           |
| μg/L = micrograms per liter | g = grams                 |
| MPN = most probable number  | kg = kilograms            |
| per 100 milliliters         | T = tonnes (metric tons)  |

Grab samples must be used for pH, temperature, cyanide, total phenols, residual chlorine, oil and grease, fecal coliform (including *E. coli*), and volatile organic compounds. For all other pollutants, 24-hour composite samples must be used. For a composite sample, only one analysis of the composite of aliquots is required.

The effluent monitoring data provided must include at least the following for each parameter: (1) the maximum daily discharge based upon actual sample values, (2) average daily discharge for all samples, expressed as concentration or mass, and the number of samples used to obtain this value.

Metals must be reported as "total recoverable metal," unless all approved analytical methods for the metal inherently measure only its dissolved form (e.g., hexavalent chromium) or otherwise directed by the Department.

### Sampling

The collection of samples for the reported analyses should be supervised by a person experienced in performing sampling of domestic wastewater. Any specific requirements in the analytical methods — for example, for sample containers, sample preservation, holding times, and the collection of duplicate samples — must be followed. The time when you sample should be representative of your normal operation, to the extent feasible, with your treatment system operating properly with no system upsets. Collect samples from the center of the flow channel, where turbulence is at a maximum, at a site specified in your present NPDES permit, or at any site adequate for the collection of a representative sample.

# Further Requirements for Table E, Whole Effluent Toxicity Testing

Each applicant required to perform WET testing must provide results of a minimum of four quarterly tests for a year, from the year preceding the permit application. Or the results from four tests performed at least annually in the 4.5 year period prior to the application, provided the results show no appreciable toxicity using a safety factor determined by the Department.

Applicants must conduct tests with multiple species (no less than two species; e.g., fish, invertebrate, plant) and test for acute or chronic toxicity, depending on the range of receiving water dilution. See 40 CFR 122.21(j)(5)(v) for further details.

WET testing must be conducted using methods approved under 40 CFR 136.
